EVENT REPORT

Ajit Singh Pal, Hon'ble Minister of State, IT & Electronics, Government of Uttar Pradesh:

"The Uttar Pradesh government is working consistently to build a digitally empowered knowledge economy through sustained governance reforms and decisive policy actions. At the same time, the state is implementing smart governance initiatives to deliver citizen-centric services that effectively reach the last mile. In parallel, Uttar Pradesh remains strongly focused on expanding investment and infrastructure opportunities. The overarching mission is to position the state as a leading destination in the country for IT and ITeS investments."

Durga Shanker Mishra, IAS, Chief Secretary, Government of Uttar Pradesh:

Uttar Pradesh has witnessed rapid development over the past five to six years, with multiple sectors recording significant progress under the leadership of Chief Minister Yogi Adityanath. This transformation aligns with Prime Minister Narendra Modi's vision of a New India, which aspires to see the country emerge as a developed nation by 2047, when India celebrates 100 years of Independence.

Kumar Vineet, IAS, Special Secretary, IT & Electronics & MD, UPDESCO, Government of Uttar Pradesh:

When material and machines come together, they lead to innovation and discovery. However, such inventions must be shared and discussed for their true value to emerge. Only through dialogue and collaboration can advancements in science, technology, and engineering translate into solutions that benefit the common citizen and contribute to nation-building. This conference is an integral part of that ecosystem, bringing together manufacturers, engineers, and end users on a single platform to collectively discuss, analyse, and shape what lies ahead.

Ajitabh Sharma, IAS, Chairman & Managing Director, Jaipur City Transport Services Limited:

Over the past four to five years, several major policy decisions have been taken, and increasing attention is now being paid to how effectively they are being implemented on the ground. The role of policymakers and the bureaucracy has been critical in this process, with a noticeable shift in administrative mindset across the state. This change, combined with political leadership driving large-scale projects and flagship schemes, has helped push the state's development agenda forward.

The scale of development witnessed in the state has been significant. Under the Production Linked Incentive (PLI) scheme, we have partnered with Dixon Technologies to manufacture notebooks in Noida, strengthening the UP manufacturing ecosystem. We invite everyone to come together and experience the product firsthand.

S.N. Rai, Co-Founder & Director, Lava International Ltd.:

I see a potential of nearly \$220 billion over the next four years, which would account for roughly 20-22 per cent of the \$1 trillion target. With Uttar Pradesh's current GDP estimated at around \$250 billion, reaching the \$1 trillion mark is an ambitious but absolutely achievable goal.

Ashish Tiwari, IFS, Secretary, Department of Environment, Forest & Climate Change Government of Uttar Pradesh:

Digital empowerment offers three key benefits. First, it significantly reduces operational costs. Second, it enables real-time analytics for better monitoring and responsiveness. Third, it supports evidence-based decision-making. Beyond these advantages, digital empowerment also holds immense potential in the field of environmental management.

Technology Presentation By:

Amit Raghuwanshi, Entity Head, Acer India (Pvt) Ltd.

Gunnam V Suresh, General Manager, Celkon

S.N Rai, Co- Founder & Director, Lava International Ltd.

Panel Discussion: Leverging Technology & Innovation for Urban Transformation
